Profile

Full-Stack Developer | AI Agent Builder | 4+ Years in Scalable SaaS Development

Results-oriented full-stack engineer with 4+ years of experience in SaaS development using React.js, .NET Core, and SQL. Specialized in healthcare and fintech platforms. Recently built AI automation agents using OpenAI and LangChain to streamline provider workflows. Hackathon winner with a passion for solving real-world problems using technology. Actively seeking remote product engineering roles.

Experience

SOFTWARE ENGINEER

SIKKA.AI | HYBRID | APRIL 2021 – PRESENT

- Led full-stack development of API Portal and Finance Portal, used by 500+ healthcare partners.
- Developed secure REST APIs for practice integrations.
- Designed dashboards and app interfaces for API key management and analytics.
- Built finance modules for invoice tracking and reconciliation.
- Created AI Agents (Patient Comms, Dental Billing, Veterinary Triage) using OpenAI, LangChain, and Ollama.
- Winner – Agent Hackathon 2025 and LLM Bot Battle 2024 at Sikka.AI.

- **API Portal**
  - Built and maintained secure REST APIs that integrate with dental, veterinary, optometry, and chiropractic practice systems.
  - Developed user interfaces for developers to manage app credentials, API keys, and monitor usage analytics.
  - Integrated access control, rate limiting, logging, and real-time reporting dashboards.
  - Technologies: **React.js**, **.NET Core**, **SQL Server**, **Swagger**, **Postman**, **JWT Auth**.
- **Finance Portal** –
  - Implemented modules for invoice generation, payment tracking, and custom financial reports for practice groups.
  - Built admin and role-based views for location-level and master-level customer accounts.
  - Enhanced performance on transaction-heavy pages and ensured accurate reconciliation logic.
  - Technologies: **React.js**, **.NET Core**, **SQL Server**, **SSRS**, **Bootstrap**.
- Developed AI agents like Patient Communication, Dental Billing, and Veterinary Symptom-to-Care using **LangChain**, **OpenAI**, and **Ollama** for intelligent healthcare automation.
- Contributed to **internal AI Agent Hackathon**, actively working on prompt engineering and agent logic to automate repetitive provider tasks.

SOFTWARE ENGINEERING INTERN
KNOVOS | DEC 2018 – MAY 2019 | GANDHINAGAR, INDIA

- Completed a 6-month internship program focused on legal tech product development.
- Worked on modules for document processing, review interface enhancements, and data redaction.
- Gained hands-on experience with **C# (.NET Framework), SQL**, and **EXT.JS** for full-stack development.
- Collaborated with senior developers and QA teams in an agile environment to deliver sprintbased features.
- Successfully redesigned existing inventory system, ordering and food storage practices, resulting in a 6% decrease in food waste and higher net profits.

Education

BACHELOR OF COMPUTER APPLICATIONS (BCA)
SARDAR PATEL UNIVERSITY, ANAND
2013 – 2016
CGPA: 8.14 / 10

MASTER OF COMPUTER APPLICATIONS (MCA)
SARDAR PATEL UNIVERSITY, ANAND
2017 – 2019
CGPA: 7.5 / 10

Skills & Abilities

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, React-Bootstrap, Tailwind
Backend: .NET Core, C#, RESTful APIs, LINQ, Entity Framework
Database: SQL Server, MySQL
Tools & Platforms: Git, Postman, Swagger, Visual Studio, VS Code, Jira
AI/ML: LLM-based agents (Hackathon projects)
Other: Agile Methodologies, API Integration, Debugging & Performance Tuning

Achievements

- **Winner** – Agent Hackathon 2025 at Sikka.AI
- **Winner** – LLM Bot Battle 2024 at Sikka.AI

Activities and Interests

- Passionate about building AI agents and exploring LLM technologies
- Enjoy participating in hackathons.
- Self-learning through courses and open-source contributions
- Avid traveller and nature explorer
- Interested in mindfulness, spirituality, and personal growth
