Bhavik M. Patel

Senior Software Engineer | ASP.NET Core & React

Anand, Gujarat, India | 7405210806 | bmpatel1994@gmail.com

Professional Summary

Full Stack Software Engineer with 5+ years of experience building scalable SaaS platforms, enterprise APIs, and modern web applications using ASP.NET Core, React, TypeScript, and cloud-native architectures. Experienced in designing highperformance backend systems, multi-tenant platforms, AI-powered workflow automation, and API ecosystems serving 500+ partners. Strong expertise in system design, REST APIs, authentication, microservices, and frontend architecture. Passionate about building scalable products for global remote teams.

Technical Skills

Frontend: React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Zustand, AG Grid
Backend: ASP.NET Core, C#, REST APIs, Entity Framework Core, LINQ, JWT Authentication, Webhooks
Architecture: Clean Architecture, Microservices, Multi-tenant SaaS, System Design, API Gateway Patterns
Databases: SQL Server, MySQL, MongoDB, Redis, Message Queues & Real-time: RabbitMQ
DevOps & Tools: Docker, Azure DevOps, CI/CD Pipelines, Git, Postman, Swagger
AI & Automation: Prompt Engineering, AI Agents, Workflow Automation
Additional: Node.js (Begineer), Express.js (Begineer)

Professional Experience

Software Engineer VALCZ INDIA PVT LTD | Onsite - Vadodara | Jul 2025 – Present

- Designed and delivered 20+ scalable REST APIs powering integrations for 500+ healthcare partners with secure authentication, rate limiting, and monitoring.
- Implemented JWT-based authentication & authorization, securing multi-service architecture.
- Developed responsive React + TypeScript applications with optimized rendering, modular architecture, and reusable component systems improving usability and maintainability.
- Architected MongoDB-backed services for high-throughput workflows, improving query performance and scalability across multiple modules.
- Containerized applications using Docker, improving deployment consistency and reducing environment issues.

- Contributed to modular architecture and performance optimization, enabling scalable product growth.

Tech Stack: ASP.NET Core, C#, MongoDB, React, TypeScript, Tailwind CSS, JWT, Docker, Azure DevOps

Software Engineer SIKKA.AI | Hybrid - Vadodara | Apr 2021 – Jun 2025

- Designed and delivered 20+ scalable REST APIs supporting integrations for 500+ healthcare partners.
- Built analytics and API management dashboards improving partner onboarding and operational visibility.
- Optimized transaction-heavy workflows, improving system reliability and reducing response times by 30%.
- Developed AI-powered automation agents using OpenAI and LangChain, reducing manual operational effort. **Tech Stack:** ASP.NET Core, React, C#, SQL Server, OpenAI, LangChain

Software Engineer Intern Knovos | Onsite – Gandhinagar | Dec 2018 – Apr 2019

- Developed document processing and data redaction modules in legal-tech systems.
- Worked with **.NET Framework, SQL, and Ext JS** in agile environment.

Key Projects

API Partner Portal
- Built enterprise API management platform for healthcare integrations
- Implemented API key lifecycle management, analytics dashboards, and access control
- Tech: ASP.NET Core, React, SQL Server, JWT

AI Workflow Automation Agents
- Developed LLM-powered automation agents using OpenAI + LangChain
- Automated patient support and healthcare workflow processes
- Integrated prompt orchestration and multi-step AI workflows

Finance Management Platform
- Designed invoice, reporting, and payment tracking modules
- Optimized transaction-heavy workflows for reliability and scalability

Education

Master of Computer Applications (MCA)
Sardar Patel University | 2017 – 2019 | CGPA: 7.5/10

Bachelor of Computer Applications (BCA)
Sardar Patel University | 2013 – 2016 | CGPA: 8.14/10

Achievements

- Winner – Agent Hackathon 2025 (Sikka.AI)
- Winner – LLM Bot Battle 2024 (Sikka.AI)
